**LITHIUM ION SECONDARY BATTERY**

Examiner: K. Han    SN: 10/572,506    Art Unit: 1795    May 7, 2009

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 2, 5-9, and 12, drawn to a lithium ion secondary battery with a can being opened at an upper portion.

Group II, claims 3, 10, 13, 15, and 17, drawn to a lithium ion secondary battery with a can being opened at a lower portion.

Group III, claims 4, 11, 14, 16, and 18, drawn to a lithium ion secondary battery with a can being opened at an upper portion and having a step formed on one side thereof.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common special technical feature present in all groups is a battery can having a space defined while being opened, a cap, an electrode assembly, and a flange of the cap is welded at an

Art Unit: 1795

outer surface of the cap by means of a micro-arc. This cannot be a special technical feature under PCT Rule 13.2 because the feature is shown in the prior art. Watanabe (JP 58-157050) teaches a sealed battery comprising a battery case, a battery cover, and an electrode assembly inserted into the case. The circumference of the case is welded at an end surface of the battery cover with plasma arc [Abstract], therefore presenting a lack of unity between the groups *a posteriori*.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
